

Garbage containers *(Based on Ordinance 2062)*

All refuse and waste containers shall be kept a minimum of 25 feet from the street edge adjacent to any premises. However, containers may be placed next to the street edge from 6:00 P.M. of the evening preceding scheduled waste pick-up date through 7:00 P.M. of the pick-up date.

Not to scale

Dumpster garbage containers four cubic yards, or less, in capacity may be stored on residential properties provided they are screened on all four sides by a solid fence or solid landscaping not less than six feet in height.

Example of a four-yard dumpster

Except for residential construction projects having a valid building permit, dumpster containers exceeding four cubic yards in capacity, shall not be placed on any residential property for more than ten consecutive days.

Please note that homeowner associations may have more stringent requirements for storage of waste containers within their communities.
